

Independent strategy advisor for the investment management business in Europe

OUR SDG COMMITMENTS

INDEFI is committed to pursuing the United Nations Sustainable Development Goals (SDGs)

We provide strategy advisory services to asset managers and private investors with the objective to help them better understand their competitive landscape, articulate their business development strategy, make the most relevant investments and build competitive advantage.

Driven by our convictions as a team and inspired by many professional and civil sustainable development initiatives (including the United Nation’s Sustainable Development Goals, the Principles for Responsible Investment, Paris COP 21, Paris Finance for Tomorrow, FSB Task Force on Climate-related Financial Disclosures), we intend to play our part, to the best of our capabilities, in addressing the issues faced by sustainable finance.

We firmly believe that it is every organisation’s responsibility to drive its own stakeholders’ commitment towards sustainable development through information, promotion and proactive action.

Defined by the United Nations in 2015, the 17 Sustainable Development Goals are a set of objectives to be achieved within the next 15 years covering the major challenges of this century regarding social, societal, environmental and governance issues.

Through this public commitment, we strive to endorse and promote the Sustainable Development Goals.

Finally, as we also believe in leading by example, we have defined and are implementing our own Corporate Social Responsibility (CSR) policy. It is named “SPIR²IT” after what defines us and sets us apart as an organisation. It embodies our convictions and our corporate culture. It aims at inspiring sustainable development initiatives in the way we work and operate as a firm as well as act individually.

INDEFI’s commitments

Sustainable finance is at the core of our activities. It is our objective to further promote SDGs among our stakeholders.

- Since 2010, INDEFI has been a pioneer in providing high value-added Environmental, Social and Governance (ESG) advisory services to asset managers and private asset investors assisting our clients in devising and implementing sustainable investment strategies.
- We are a recognised contributor in the field of social responsibility via the development of customised methodologies and thought-leadership ESG publications.
- We regularly contribute to public knowledge sharing via conferences.
- We are an active member of organisations promoting sustainable finance, including the UNPRI, the Forum de l’Investissement Responsable (FIR) and France Invest (Association Française des Investisseurs pour la Croissance).
